

Seminar

Biorefinery of wastes. Dream or Reality?

Date	22 July 2015
Location	ETSE, Universidad de Santiago de Compostela
Objective	The purpose of the Seminar is to analyze different options aiming at recovering resources from wastes throughout innovative processes, now at early stages of development at lab and/or pilot scale.

Program

16:00 – 16:10	Introduction
16:10 – 16:30	Xavier Flotats (Universitat Politècnica de Catalunya) “New trends on manure processing”
16:35 - 16:55	Iano Premier (University South Wales) “Scale, control and integration of Microbial Bioelectrochemical Systems (BES)”
17:00 – 17:20	Jesus Colprim (Universitat de Girona) “CO ₂ conversion to value added products by Bioelectrochemical Systems (BES)”
17:25 – 17:45	Robbert Kleerebezem (Technical University Delft) “VFA-platform for resource recovery from low value feedstocks”
17:50 – 18:00	Discussion
